Commissioner Livengood asked about traffic impacts and staff indicated that the traffic impact analysis has been completed and that the impact level is acceptable under city policy. Livengood also asked if there would be any impacts to the existing sidewalks surrounding the site, as he is concerned with pedestrian safety. Staff said that they would research the issue.

Commissioner Speaker asked about the roof and parapet heights and staff indicated that these are shown on page 2 of the staff report. Staff also stated that a variance is being requested for the parapet to allow a height of 50'.

Commissioner Scandura stated that he has concerns with increased truck traffic and the site's proximity to the school. He asked staff to explore ways to limit traffic to increase pedestrian safety. Scandura also asked about the noise analysis, which used residential standards, and asked if there had been any changes. Staff indicated that industrial noise standards were used on the site and residential noise standards were used in the areas surrounding the site. Staff also noted that the construction of the outdoor secondary recycling facility and the two transfer stations will reduce noise levels.

He also noted that this item will come before the Planning Commission at a study session on January 27, 2009.

Commissioner Livengood asked if the proposed structure would be 2-story and staff stated that the project plans are for a ground-level restaurant only.

Farley also asked how much space would be required for the fence and the outdoor planter and staff said that they would provide that information when this item comes before the Planning Commission at the public hearing on January 27, 2009. Farley also questioned the dotted line on staff report attachment 2.2 and staff said that represents the trash route from the building.

Chair Shier Burnett asked what criteria ABC (Alcohol Beverage Control) uses to administer a permit. She also asked how many bars and restaurants that serve
